

AGRICO

PLASTIQUES

Your perfect partner to help you optimize the way to manage, handle, store and transport your crops and productions.

Agriculture

From **LAND** to **DELIVERY**,

we have the solutions to **maximise** your efficiency, productivity and profitability!

YOUR DAILY LIFE, WE KNOW IT WELL, WE ARE HERE TO ASSIST YOU

We take the time to analyze your needs and your reality in order to find the right equipment

Benefit from our expertise and our judicious advice to obtain concrete results on a daily basis:

- Improve your operations flow for more fluidity and efficiency
- Optimize your harvesting methods to do more, in less time
- Preserve the good condition of your products during storage, handling and transportation
- Gain workspace in your farm, warehouse, refrigerator and freezer
- Cut down your recurring expenses by acquiring durable and reusable plastic equipment
- Reduce your transportation costs by maximizing the loading of your trucks
- Ensure peace of mind with safe equipment that meets CFIA/FDA standard
- Progress without any worries using plastic equipment that can adapt to your growth

WITH US,

you obtain great solutions to increase your efficiency and profitability.

YOU DESERVE THE BEST...

And your harvest products should be treated with great care.

With our great selection of equipment intended for farmers, greenhouses and breeders, you get:

- An optimized food freshness
- An extended conservation time
- A more efficient and faster freezing
- A considerable reduction of food losses

Benefit from specially designed plastic equipment to ensure the quality of your harvested products and crops!

We offer helpful solutions to simplify the handling and transport of your products, from your fields to your facilities or directly to your points of sale.

- Durable equipment specially designed for multiple round trips
- Economical equipment for exporting or one-way shipping

BY YOUR SIDE

We are partners of Quebec's farmers and breeders since 1980

Much more than a supplier...

We are front-line consultants, specialists in plastic equipment that can really help you make the most of your harvesting, handling, storage and shipping methods. We have the right equipment for your crops. Tell us about your objectives and receive propositions adapted to your reality.

We have the expertise and a human approach.

First of all, it is the listening and the understanding of your project that is important for us. We take the time to evaluate your need from all angles to determine the ultimate solution that will optimize your processes. It's our philosophy to come up with smart, effective and sustainable solutions.

PALLET BOXES

BENEFITS OF PLASTIC

The + of plastic equipment compared to wood or stainless steel

- Less expensive, lighter and easier to handle than stainless steel ones
- More efficient, durable and safer than wooden ones, more attractive colour and appearance
- Inert to humidity, they do not rust and do not absorb water
- Their weights, load capacities and dimensions remain invariable
- Non-porous material resistant to insects, bacteria, fungi, chemicals, solvents and soaps
- Hygienic and easy to wash by hand or by pressure washer, can be disinfected
- Safe, smooth surfaces and no contamination from splinters or rusty nails
- Designed for refrigerators and freezers and resistant to outdoor conditions
- Robust, durable, reusable and 100% recyclable at the end of their service life
- Marketing tool: you can advertise and spread your brand with equipment that reveals your colours, logo and business name

WITH OUR PLASTIC EQUIPMENT:

- you save money
- you work more efficiently
- you respect the environment

HANDLING CARTS
