PLASTIQUES

Your partner in handling and storage solutions

Warehouses

Because **EFFICIENCY**,
PRODUCTIVITY and **PROFITABILITY**

depend on good planning and
accurate management of your
spaces and resources

YOUR DAILY LIFE, WE KNOW IT WELL, WE ARE HERE TO ASSIST YOU

We take the time to analyze your needs and your reality in order to find the right equipment

Benefit from our expertise and our judicious advice to obtain concrete results on a daily basis:

- Organize your work areas and gain floor space in your warehouses, picking areas and shipping docks
- Protect and facilitate the handling of loose, bulk or non-palletized products
- Easily move and transport your merchandise in tight spaces, elevators or small doors
- Improve the organization and display of your product to quickly access the parts you need
- Ensure the safety of your employees; avoid rusty nails, splinters and contaminations
- Preserve the good condition of your food and industrial merchandise when handled or stored
- Reduce part breakage, hassle and expenses associated with replacing them
- Reduce your transportation costs by maximizing the loading of your trucks
- Reduce your expenses; acquire durable and reusable equipment that will last for several years

YOU DESERVE THE BEST...

To work efficiently, without worry and in harmony with all types of products

With our great selection of equipment intended for handling and warehousing of edible, industrial or chemical products, you get:

- Compliance with environmental, industrial, chemical and food regulations
- Easy and safe sanitation facilitating the reuse of equipment
- Guaranteed profitability due to a long service life of our equipment
- Equipment better adapted to wet, cold, hot, chemical or outdoor environments

Designed to optimize your spaces, your logistics and your transport:

We offer you effective solutions to simplify the daily handling of your products in different areas of your plant or during their expeditions:

- Robust and durable equipment specially designed for multiple round trips
- Economical equipment for exporting or for one-way shipping

BY YOUR SIDE

Agrico Plastics; your # 1 partner for your storage and handling solutions

Since 1980, we have been assisting and advising several big names in the industrial sector and distribution centers. We have developed with them efficient logistic solutions that are perfectly adapted to their reality, offering them today, a better performance. With the right equipment in hand, we know how to optimize supply chains: warehousing, handling, loading, unloading, shipping and transporting products of all kinds.

Much more than a supplier, we are front-line consultants, specialists in plastic equipment.

We know which plastic equipment is best designed to handle, transport or store the industrial or food products you have on site. We can assist you in the selection of this equipment that best suits your application: for a conveyor, assembly line, warehouse, stock room, processing room, refrigerator, racking system, etc. We can really help you optimize your plant and make your daily operations more profitable. Tell us about your objectives and receive propositions adapted to your reality.

We have the expertise and a human approach.

First of all, it is the listening and the understanding of your objective that is important to us. We take the time to evaluate your need from all angles to determine the ultimate solution that will optimize your processes. It's our philosophy to come up with smart, effective and sustainable solutions.

PALLET BOXES

From industrial or CFIA food grade plastic. Robust, durable and ideal for bulk; move more, in less time. Solid or vented walls.

- Vented walls for draining or aeration
- Optional drain for easy washing
- Maximize high storage
- Assorted colors for quick identification
- Ideal for multiple round trips
- Compatible with rotating forks
- Suitable for cold or frozen storage
- Custom made, access door and casters

FOLDABLE PALLET BOXES

HD versatile bins; designed for rough applications. Hinged doors for interior access. Collapse when empty to save space.

- Walls are easy to fold and unfold
- Reduce return transportation costs
- Maximize warehouse space
- Up to 65% space saving
- 2 doors facilitating access to content
- Ideal for bulk or to protect loose parts
- Stack securely with or without the lid
- Robust, up to 2000 lb capacity

BINS AND CONTAINERS

Assorted sizes that maximize handling, palletization and storage. Various colours for content management and identification.

- Resistant to solvents, oils, greases
- Vented walls for aeration or soaking
- Nest together for space saving
- Securely stack with or without the lid
- Dimensions adapted to pallets
- Compliant with food regulations
- Identification, lids and carts

BENEFITS OF PLASTIC

The + of PLASTIC equipment compared to WOOD

- Non-porous material resistant to insects, bacteria, fungi, chemicals, solvents, soaps and pathogens
- Hygienic and easy to wash by hand or by pressure washer, can be disinfected
- Inert to wetness, do not rust and do not absorb water
- Their weights, load capacities and dimensions remain invariable
- Safe and ergonomic, smooth surfaces without nails or splinters
- Large selection of equipment available in many colors, sizes and capacities
- Robust, reusable for years and fully recyclable at end of their service life
- Ideal for exportation, meets all regulations
- More attractive colours and aspects, improve your corporate image
- Marketing tool: you can advertise and spread your brand with equipment that reveals your colors, logo and business name

WITH OUR PLASTIC EQUIPMENT:

- you meet food and safety standards
- you work more efficiently
- you save money

Safe, robust and durable, our plastic equipment will give you peace of mind for years to come.

PALLETS

Industrial or FDA food grade plastic. Safer and more durable than wood. They don't absorb water and have a constant weight.

- Suitable for indoor, outdoor, fridge, freezer
- Safe; no rusty nails or splinters
- Accurate for drive-in or push-back system
- Shaped for rack storage or for conveyor
- For safe handling and storage of drums
- Nest together to save space
- Economical and lightweight for export
- Durable for multiple round trips

SHELVING SYSTEMS

Designed from plastic, stainless steel or epoxy coated metal. Ensure a safe and optimal storage. Available with or without wheels.

- Strong and guaranteed against rust
- Suitable for refrigerator and freezer
- Antimicrobial treated and stain resistant
- Shelves adjust at 1" increments
- Up to 800 lb per shelf
- Up to 2000 lb per unit
- Shelf ledges prevent items from falling
- Casters and handles to create a shelf cart

HANDLING CARTS

Very useful, a must to easily and safely move your products of all kinds. Variety of models made of industrial or CFIA food-grade plastic.

- Single-wall carts for dry products such as metal, cardboard, glass, textile, etc.
- Double-wall carts with drain for liquid containment, soaking application or bulk
- Heavy duty wheels for heavy loads
- Corner wheel-pattern for long distances
- Diamond wheel-pattern for tight spaces
- Easy to wash and disinfect
