of your liquid products

Tanks

WHATEVER YOUR APPLICATION,  
YOUR PROJECT OR  
YOUR SECTOR OF ACTIVITY

We have the **ideal tank**  
to meet your needs

# WE HAVE THE LARGEST CHOICE OF PLASTIC TANKS IN QUEBEC

**Because we work closely with many different manufacturers of tanks, we offer the largest selection of models, shapes, dimensions and volumes.**

**More than just a supplier, we are experienced front-line consultants specialized in plastic tanks;**

- We know well all our products: their characteristics, their uses and all the accessories that are included or optional
- We know our manufacturers: the variety and quality of their products, warranties, certifications and manufacturing delays
- We confirm that the selected tank is suitable for your use and meets the standards of your industry
- We validate the density and chemical compatibility of liquids and tanks for a safe combination
- We inform you about everything you need to know; the various ways to fill it, use it, transport it, empty it and accessorize it
- We offer various accessories and custom assemblies to adapt the tank to your project and to have it ready for use upon receipt

## DID YOU KNOW?

**It is necessary to be vigilant in the selection of your tank and its components...**

A bad combination such as the shape of the tank, its equipment, its usage, its temperature of use, its chemical compatibility, its density, a missing certification, or even a connection badly adapted to the application or to the product, could all have regrettable consequences.

**It is essential to use the right tank according to the purpose you intend to use it to work productively, safely and without worry.**

**BECAUSE YOU DO NOT HAVE A SECOND CHANCE TO MAKE THE RIGHT CHOICE, TAKE ADVANTAGE OF OUR EXPERTISE!**

**Since there are so many models and characteristics that exist to meet the various applications on the market, it is sometimes difficult to find yourself amongst all the information...**

- **We are specialists at your service:** we orient you towards the right equipment to make sure it is perfectly adapted to your application
- **A professional and dynamic team :** opt for fast service and peace of mind by contacting one of our experienced consultants ready to help you
- **Visit our website:** see all our products, consult information sheets, purchase guides, technical drawings and submit your quote request online

# WE OFFER YOU MORE THAN TANKS

We evaluate your needs from every angle to determine which tank will best optimize your space and performance. It is our philosophy to come up with smart, effective and sustainable solutions.

## Because we know our products very well, we are able to:

- Tell you under what circumstances it is wise or less recommended using certain types of tanks
- Explain to you the advantages and disadvantages of each tank, in order to isolate the specific features that will benefit your use
- Find you exactly the same tank, or interchange, when replacing or adding equipment
- Recommend you the best tank adapted to different types of products, whether they are food, industrial or chemical
- Find you a tank that has the required certifications to meet your industry standards
- Inform you about the components included with the tank, optional accessories and custom-made modifications

Our customers are loyal and trust us because for them, we are true partners of their success. Our listening to understand their needs, their goals and their reality is the key to our success, and their satisfaction.

## WE FIND YOU THE WINNING COMBINATION
